

Настройка отображения зубной формулы

Визуализация зубной формулы при любых условиях

Для того чтобы отобразить зубную формулу в осмотре, необходимо выполнить следующую последовательность действий в строго указанном порядке:

1. Зайти в требуемый осмотр и открыть функционал "Запросов" (рисунок 1).

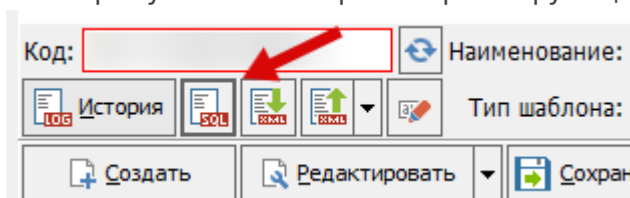

Рисунок 1 - Открытие редактора SQL

запросов

2. Добавить новый запрос «Зубная формула» (DENTAL_FORMULA), из числа SQL Заготовок (рисунок 2).

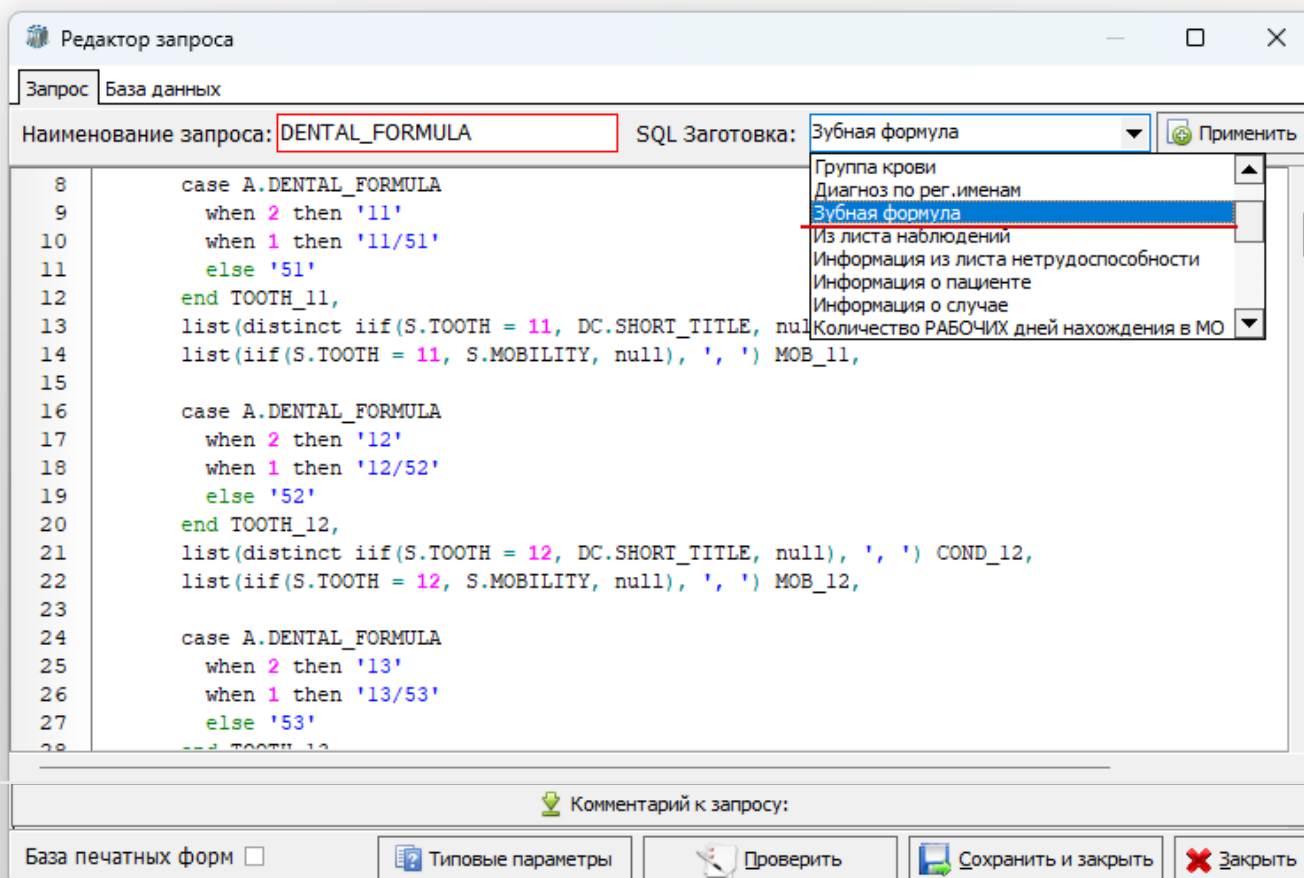

Рисунок 2 - Применение SQL заготовки

3. Перейти в редактор печатных форм (рисунок 3).

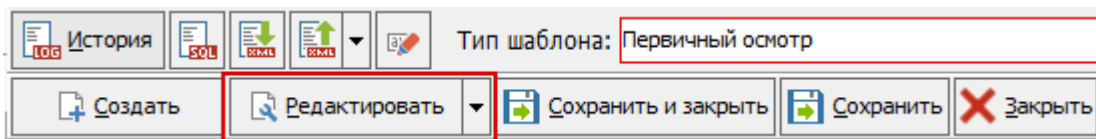

Рисунок 3 -

Кнопка открытия редактора печатных форм

4. Скопировать «Код №1» из инструкции и вставить его в требуемом месте макета печатных форм (рисунок 4).

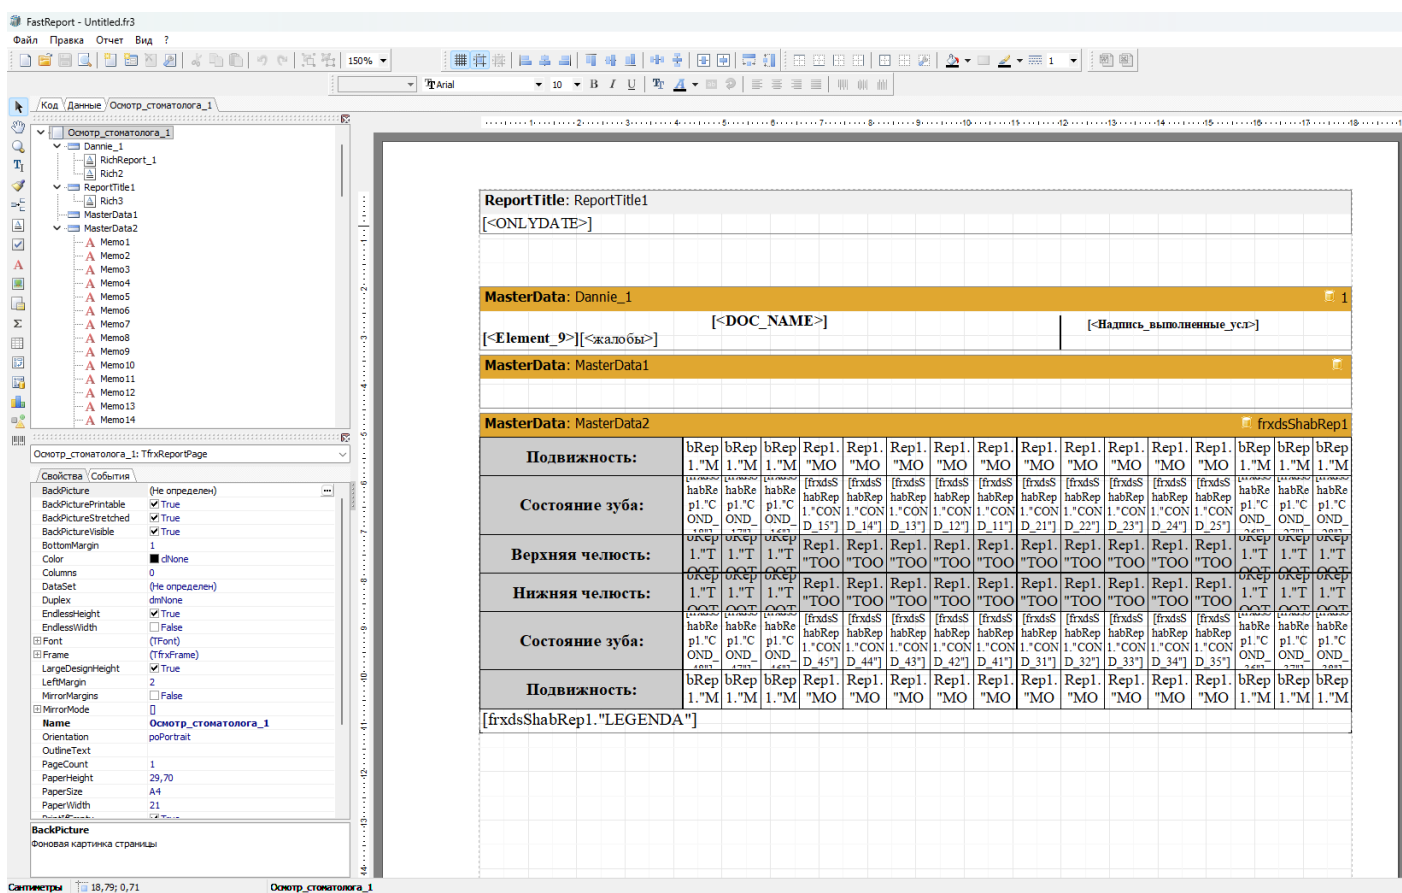

Рисунок 4 - Пример размещения зубной формулы в редакторе печатных форм

5. Сохранить и закрыть редактор печатных форм и после окончания редактирования шаблона сохранить и закрыть сам осмотр.

Код 1 – Готовая разметка зубной формулы с настроенными ячейками

Визуализация зубной формулы при необходимости

Если зубную формулу необходимо отображать не всегда, а при необходимости, то в осмотр добавляется дополнительная галочка, после нажатия на которую специалист, заполняющий осмотр, будет решать в какой момент это делать. Для того чтобы настроить осмотр на такой режим работы необходимо выполнить следующую последовательность действий в строго указанном порядке:

1. Зайти в требуемый осмотр и открыть функционал "Запросов" (рисунок 1).
2. Добавить новый запрос «Зубная формула» (DENTAL_FORMULA), из числа SQL Заготовок (рисунок 2).
3. Добавить в шаблон, в удобном месте элемент "Галочка" и дать ей понятное описание, например «Печать зубной формулы».
4. Перейти в редактор печатных форм (рисунок 3).
5. Скопировать «**Код №2**» из инструкции и вставить его в требуемом месте макета печатных форм (рисунок 4).
6. Скопировать «**Код №3**», перейти в редакторе печатных форм на вкладку «Код» и вставить скопированный код. (рисунок 5).

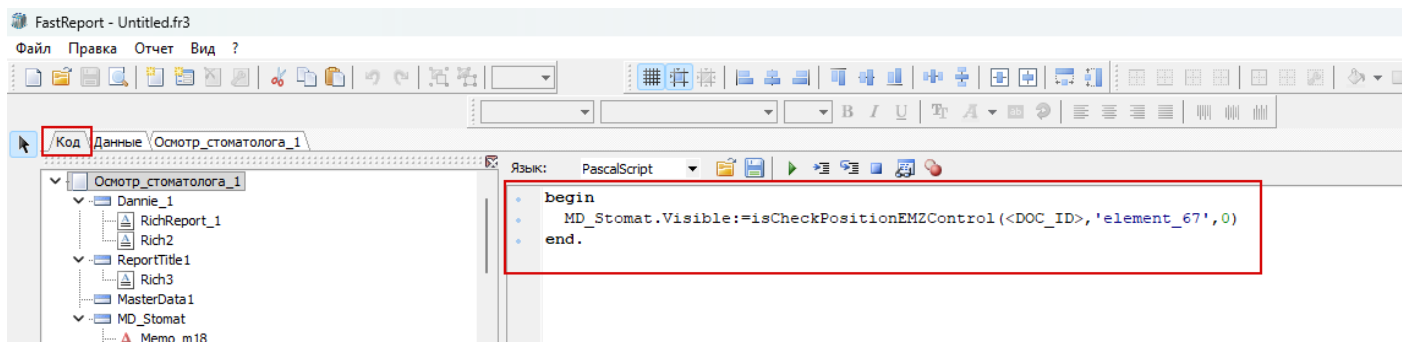

Рисунок 5 - Настройка отображения зубной формулы по галочке

7. Сохранить и закрыть редактор печатных форм и по окончании редактирования шаблона сохранить и закрыть сам осмотр.

```

Код 2 – Готовая разметка зубной формулы с настроенными ячейками (скрытая по умолчанию)

```

begin
  MD_Stomat.Visible:=isCheckPositionEMZControl(<DOC_ID>,'element_67',0)
end.

```

Код 3 – Пример кода для настройка отображения зубной формулы по нажатию галочки

Внимание! Использование кода №3 без использования кода №2 не дадут желаемого результата. При использовании кода №3 крайне велика вероятность что код будет необходимо адаптировать под каждый осмотр индивидуально. Для этого в коде будет меняться запись "element_67" на ту, который используется в конкретном осмотре. [Подробнее о работе данной функции описано тут.](#)
